

- **Purpose:** The ISOA Energy Committee aims to promote sustainable energy practices, improve efficiency, and influence policies. We strive to encourage energy and petroleum efficiencies that reduce waste and support the environment, while simultaneously supporting agile governmental agencies and providing a lethal Department of Defense that is not constrained by energy requirements.

Goals:

- **Develop Policies & Initiatives:** Advise on regulations, incentives, and energy goals.
- **Educate & Engage Stakeholders:** Provide resources, workshops, and events to inform governmental decision-makers.
- **Infrastructure Sustainment:** Advise on technology to ensure utility and military infrastructure is secure, safe, reliable, and efficient.
- **Reduce Energy Consumption:** Advise on strategies to minimize waste and improve efficiency to maximize capabilities.

- **Initial kickoff meeting was June 6th**
- Two pathways for the committee
 - Installation & Sustainable Energy
 - Bulk Fuels
- Initial energy paper out in the next quarter
- First Energy webinar in September
- **Next Meeting on July 11th at 11 AM EST**
 - Invited the military services to participate in the committee meeting
